## Water Billing System (Django)

- Allows admin to manage customer records, bills, and payments
- Integrated user login/authentication and CRUD operations
- Utilized SQLite for database management
- Enhanced understanding of MVC architecture and backend development

## Water Billing System – ASP.NET (C#)

Created a desktop/web-based billing system using ASP.NET framework.

- Implemented customer and billing modules
- Managed database operations and reporting
- Applied object-oriented programming and event-driven forms

## Payroll Management System – Java (NetBeans + DBMS)

Built a payroll system using Java with GUI via NetBeans and database integration.

- Employee record management and payroll calculations
- Connected to a relational database for data persistence
- Focused on logic building and database handling (JDBC)
